**Marginalised Communities in Higher Education** Neil Harrison 2021 "Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--

**Righteous Porkchop** Nicolette Hahn Niman 2010-10-19 Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

**The Black Opal** Katharine Susannah Prichard 2021-03-21 T16:58:09Z Katharine Susannah Prichard was born in 1883 to Australian parents then living in Fiji, but she grew up in Tasmania, lived for a while in both Melbourne and London before finally settling in Western Australia. She was one of the co-founders of the Communist Party of Australia in 1921, and her status as a communist and a female writer led to her being frequently under surveillance and harassment by the Australian police and other government authorities. She wrote *The Black Opal* in 1921, and the novel focuses on the very close-knit opal-mining community living and working on Fallen Star Ridge, a fictitious location set in New South Wales, Australia. Life is hard for the miners as their fortunes rise and fall with the amounts and quality of black opal they can uncover. Black opal is a beautiful mineral with fiery gleams of color, much valued for jewelry. Finding productive seams of such opal is a matter of both hard work and good luck. The novel is a well-drawn study of the relationships of the people living on the Ridge, and the two main characters are portrayed with clarity: Michael Brady, an older man much respected by the other miners for this knowledge and ethical approach, and Sophie Rouminof, a beautiful teenage girl who is the darling of the camp but who abruptly runs away to America after being disappointed in love. Despite the difficulties the individual miners face, there is a community spirit and an agreement on basic values and principles of behavior at the Ridge. But this community of shared endeavor is eventually jeopardized by the influence of outsiders, in particular an American who wishes to buy up the individual mines, operate them under a company structure, and simply pay the miners a salary. This conflict between capitalism and honest manual labour becomes one of the most important themes of the work. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Lusciously romantic and full of action-packed drama, readers will be swept away by this thrilling novel. Dawn Montgomery knows that monsters really do come out at night—after all, they are her job. It's just after the thirty-year war between vampires and humans, and as an ambassador between the two sides (a role she inherited when her parents were killed), Dawn quickly learns that balancing schoolwork, teen life, and the requests of Lord Valentine, the most frightening vampire in the region, isn't easy. There's nowhere left to hide. I thought vampires were our enemies—they controlled our lives, isolated our cities, and demanded our blood—until I met Victor. With Victor taking over as the new Lord Valentine, things were supposed to get better. Instead, they're worse than ever. Day Walkers, a new breed of vampires who can walk in the sun, are terrorizing the city. Blood supplies are low, and if Victor's vampires don't get enough, they will become infected with the Thirst—a disease that will turn them into mindless killers. To stop it, I must journey across the desolate wasteland to the very place where the sickness began. I can only hope that the answers that await me are enough to save us all...before it's too late.

**A History of the Italian Space Adventure** Giovanni Caprara 2020-08-27 This well-documented and fascinating book tells how, over the centuries, a series of visionaries, scientists, technologists, and politicians fostered the involvement of Italy in space exploration. The lives of these pioneers was often far from easy, yet they persevered. The fruits of their efforts can today be witnessed in Italy's success within the cutting-edge space sector. Italy's history in space started at the end of the fourteenth century and continued with the development of fireworks. Later, the nineteenth century marked the beginning of research into rockets in a more scientific way. After World War II, rocket technology was advanced with the aid of German scientists, and in the 1960s Luigi Broglio, the father of Italian space exploration, designed the San Marco satellite. In 1979 the first Italian Space Plan was launched, but it was the foundation of the Italian Space Agency in 1988 that kick-started a program of exploration in various fields of cosmic research. The outcome was construction of the Vega launcher and collaboration in the International Space Station. Now the Italian space industry stands ready to play an important role in the Gateway orbital station. All of this history, and more, is explored in this riveting book.
