**Administrative Law and Governance in Asia** Tom Ginsburg 2008-10-30 This book examines administrative law in Asia, exploring the profound changes in the legal regimes of many Asian states that have taken place in recent years. Political democratization in some countries, economic change more broadly and the forces of globalization have put pressure on the developmental state model, wherein bureaucrats governed in a kind of managed capitalism and public-private partnerships were central. In their stead, a more market-oriented regulatory state model seems to be emerging in many jurisdictions, with emphases on transparency, publicity, and constrained discretion. This book analyses the causes and consequences of this shift from a socio-legal perspective, showing clearly how decisions about the scope of administrative law and judicial review have an important effect on the shape and style of government regulation. Taking a comparative approach, individual chapters trace the key developments in the legal regimes of major states across Asia, including China, Japan, Korea, Malaysia, Taiwan, Hong Kong, Indonesia, Singapore, the Philippines, Thailand and Vietnam. They demonstrate that, in many cases, Asian states have shifted away from traditional systems in which judges were limited in terms of their influence over social and economic policy, towards regulatory models of the state involving a greater role for judges and law-like processes. The book also considers whether judiciaries are capable of performing the tasks they are being given, and assesses the profound consequences the judicialization of governance is starting to have on state policy-making in Asia.

**Document Production in International Arbitration** Reto Marghitola 2015-10-20 Because document production can discover written evidence that would otherwise not be available, it is often the key to winning a case. However, document production proceedings can be a costly and time-consuming exercise, and arbitral awards in particular are often challenged on grounds that relate to document production orders. The task of balancing the conflicting interests of the parties in this context is a major responsibility of arbitral tribunals. This book's analysis focuses on whether there exist legal principles on which arbitrators should establish rules of document production in both civil law and common law countries, and shows how international arbitration is affected. The author examines the relevant discretion of arbitral tribunals under US, English, Swiss, German, and Austrian law, and under nine of the most important sets of institutional rules, including the ICC Rules, the LCIA Rules, and the Swiss Rules. The presentation mines case law and legal literature for concepts based on the common expectations of the parties, the legitimate expectations of a party, the duty to balance different procedural expectations of the parties, the presumed intent of the parties, the underlying hypothetical bargain, implied terms, and the arbitrators' discretion. Among the topics and issues investigated are the following: - procedural rules on document production versus procedural flexibility; - how arbitral tribunals can modify the IBA Rules on a case-by-case basis; - discretion granted by legislation in each country covered; - electronic document production; - how to deal with privilege and confidentiality objections; - how to formulate or answer document production requests; - effective sanctions in case of non-compliance with procedural orders of the arbitral tribunal; - what grounds for annulment and non-enforcement a losing party can raise in what countries. Perhaps the greatest benefit of the book is the inclusion of model clauses, commensurate with both civil law and common law expectations. The author explicates the advantages and inconveniences of each model clause, and clarifies the influence of each clause on the efficiency of the proceedings and the enforcement risk. For practitioners, the book not only gives counsel a thorough overview of possible arguments for and against document production, but also assists arbitrators find a way through the jungle of opinions on the interpretation of the IBA Rules. Legal academics will appreciate the author's deeply informed analysis and commentary and the book's contribution to increasing the predictability of arbitral decisions on document production and showing how issues in dispute can be narrowed by tailor-made rules, thus helping to raise the efficiency and reduce the costs of arbitral proceedings.

Arbitration in Egypt Ibrahim Shehata 2021-10-05 Egypt, and in particular the Cairo Regional Centre for International Commercial Arbitration (CRCICA), has clearly cemented its status as a preferred seat for arbitration cases in both the Middle East-North Africa (MENA) region and the African continent. To assist parties with a need or desire to arbitrate disputes arising in these regions - whether commercial or investment - this incomparable book, the first in-depth treatment in any language of arbitration practice under Egyptian law, provides a comprehensive overview of the arbitration process and all matters pertaining to it in Egypt, starting with the arbitration agreement and ending with the recognition and enforcement of the arbitral award. Citing more than 2,500 cases - both awards and arbitral-related court judgments - the book's various chapters examine in detail how Egypt's arbitration law, based on the UNCITRAL model law, encompasses such internationally accepted arbitral provisions and aspects as the following: application of the New York Convention; concept of arbitrability; choice of applicable law; formation of the arbitral tribunal; selection, rights, duties, liability, and challenge of arbitrators; arbitral procedures; evidence and experts and burden of proof; form and content of arbitral awards; annulment and enforcement procedures; interaction between Sharia law and arbitration; role of Egypt's Technical Office for Arbitration (TOA); and judicial fees. Special issues such as third-party funding and public policy as well as particular areas of dispute such as construction, sports, real estate, labor and employment, tax, competition, intellectual property, and technology transfer are all covered. The author offers practical guidelines tailored to arbitration in these specific areas of law. An added feature is the many figures and other visuals that accompany the text. For whoever is planning to or is currently practicing arbitration in the Middle East, this matchless book gives arbitrators, in-house counsel and arbitration practitioners everything that is needed to answer any question likely to arise. This book should be on the shelf of every practitioner and academic wishing to comprehend arbitration in Egypt as construed by the Egyptian Courts.

Islam and Evolution Shoaib Ahmed Malik 2021-05-03 This book attempts to equip the reader with a holistic and accessible account of Islam and evolution. It guides the reader through the different variables that have played a part in the ongoing dialogue between Muslim creationists and evolutionists. This work views the discussion through the lens of al-Ghazali (1058-1111), a widely-known and well-respected Islamic intellectual from the medieval period. By understanding al-Ghazali as an Ash'arite theologian, a particular strand of Sunni theology, his metaphysical and hermeneutic ideas are taken to explore if and how much Neo-Darwinian evolution can be accepted. It is shown that his ideas can be used to reach an alignment between Islam and Neo-Darwinian evolution. This book offers a detailed examination that seeks to offer clarity if not agreement in the midst of an intense intellectual conflict and polarity amongst Muslims. As such, it will be of great interest to scholars of Science and Religion, Theology, Philosophy of Religion, Islamic Studies, and Religious Studies more generally.

**When A Lawyer Falls In Love** Amrita Suresh 2014-07-22 A cheeky account of a chubby law graduate, as he waddles through life and law text books, in his rather futile attempts at wooing his pretty Gujarati classmate. Ankur Palekar, a third year law student believes his life is quite sorted out, except that he does not want to become a lawyer, has a family history of lunacy and has actually fallen in love. Vyas, Ankur's room mate and best friend, has no such problems - only a girl friend who emerges from a grave yard of all places and who insists on visiting him in his boy's hostel. A Malayali friend, whose car never starts and vocal chords never stop, a college festival being organized without the college and an arranged marriage which is more deranged than arranged are some of the other highlights. Funny, pacy, yet it has it's moments, 'When a Lawyer falls in love....' Is the kind of book, that will make you laugh and cry, both for the same reasons!

Capitalism's Achilles Heel Raymond W. Baker 2005-08-05 For over forty years in more than sixty countries, Raymond Baker has witnessed the free-market system operation illicitly and corruptly, with devastating consequences. In Capitalism's Achilles Heel, Baker takes readers on a fascinating journey through the global free-market system and reveals how dirty money, poverty, and inequality are inextricably intertwined. Readers will discover how small illicit transactions lead to massive illegalities and how staggering global income disparities are worsened by the illegalities that permeate international capitalism. Drawing on his experiences, Baker shows how Western banks and businesses use secret transactions and ignore laws while handling some \$1 trillion in illicit proceeds each year. He also illustrates how businesspeople, criminals, and kleptocrats perfect the same techniques to shift funds and how these tactics negatively affect individuals, institutions, and countries.

**The Trade and Climate Change Nexus** Paul Brenton 2021-10-22 While trade exacerbates climate change, it is also a central part of the solution because it has the potential to enhance mitigation and adaptation. This timely report explores the different ways in which trade and climate change intersect. Trade contributes to the emissions that cause global warming and is itself also affected by climate change through changing comparative advantages. The report also confronts several myths concerning trade and climate change. The Trade and Climate Change Nexus: The Urgency and Opportunities for Developing Countries focuses on the impacts of, and adjustments to, climate change in developing countries and on how future trade opportunities will be affected by both the changing climate and the policy responses to address it. The report discusses how trade can provide the goods and services that drive mitigation and adaptation. It also addresses how climate change creates immense challenges for developing countries, but also new opportunities to promote trade diversification in the transition to a low-carbon world. Suitable trade and environmental policies can offer effective economic incentives to attain both sustainable growth and poverty reduction.

**Pediatric Cochlear Implantation** Nancy M Young 2016-09-16 This book will move the field of pediatric cochlear implantation forward by educating clinicians in the field as to current and emerging best practices and inspiring research in new areas of importance, including the relationship between cognitive processing and pediatric cochlear implant outcomes. The book discusses communication practices, including sign language for deaf children with cochlear implants and the role of augmentative/alternative communication for children with multiple disabilities. Focusing exclusively on cochlear implantation as it applies to the pediatric population, this book also discusses music therapy, minimizing the risk of meningitis in pediatric implant recipients, recognizing device malfunction and failure in children, perioperative anesthesia and analgesia considerations in children, and much more. Cochlear Implants in Children is aimed at clinicians, including neurotologists, pediatric otolaryngologists, audiologists and speech-language pathologists, as well as clinical scientists and educators of the deaf. The book is also appropriate for pre-and postdoctoral students, including otolaryngology residents and fellows in Neurotology and Pediatric Otolaryngology.

**Volume Control** David Owen 2019-10-29 The surprising science of hearing and the remarkable technologies that can help us hear better Our sense of hearing makes it easy to connect with the world and the people around us. The human system for processing sound is a biological marvel, an intricate assembly of delicate membranes, bones, receptor cells, and neurons. Yet many people take their ears for granted, abusing them with loud restaurants, rock concerts, and Q-tips. And then, eventually, most of us start to go deaf. Millions of Americans suffer from hearing loss. Faced with the cost and stigma of hearing aids, the natural human tendency is to do nothing and hope for the best, usually while pretending that nothing is wrong. In Volume Control, David Owen argues this inaction comes with a huge social cost. He demystifies the science of hearing while encouraging readers to get the treatment they need for hearing loss and protect the hearing they still have. Hearing aids are rapidly improving and becoming more versatile. Inexpensive high-tech substitutes are increasingly available, making it possible for more of us to boost our weakening ears without bankrupting ourselves. Relatively soon, physicians may be able to reverse losses that have always been considered irreversible. Even the insistent buzz of tinnitus may soon yield to relatively simple treatments and techniques. With wit and clarity, Owen explores the incredible possibilities of technologically assisted hearing. And he proves that ears, whether they're working or not, are endlessly interesting.
