Preparing the Honda Cr and Xr for Competition: Includes Training Tips from Marty Smith, and a Detailed Look at the Cr and Rc Honda Factory Race Bi Jim Gianatsis 2011-10-01 Preparing the Honda CR and XR for Competition includes Training Tips from Marty Smith, and a detailed look at the CR and RC Honda Factory Race Bikes First published in 1979 as the "Moto-X Fox Guide to Preparing the Honda CR and XR for Competition," this expanded 84-page book was written and photographed by famed 1970's Cycle News editor, racer and motocross journalist Jim "Jimmy the Greek" Gianatsis. Included is a later published 16-page Supplement featuring the 1980 season water-cooled RC Pro-Link monoshock works bikes, and a look at the rare RC125-80 twin cylinder motocross bike. Covered is the development and racing history of the Honda 2-stroke CR production and RC works bikes raced by the Don Jones family with Gary and DeWayne in 1973, through to the exotic RC works machines raced by Marty Smith, Marty Tripes, Pierre Karsmakers, Jimmy Ellis, Graham Noyce and Brad Lackey up through 1980 with the water-cooled Pro-Link bikes. Included is race bike preparation from American Honda factory mechanics Cliff White and Bill Buchka. Honda CR production bike preparation and tuning is provided by the Moto-X Fox Racing Team, the top privateer team in motocross with tuners Keith Bontranger and Paul Turner for riders Steve Wise, Jim Turner, Larry Wosick and the Honda factory team. There is also a special chapter covering the Honda XR

4-stroke trail bikes and how to prepare them for motocross. Included is "Training Tips from Marty Smith" of Team Honda and 500cc National Motocross Champion. "Preparing the Honda CR and XR for Competition" serves as very interesting reading and a great historical reference guide for dirt bike fans both young and old. Many of the bike preparation and riding tips are still relevant today. A must have for any dirt bike enthusiast or collector.

Race Tech's Motorcycle Suspension Bible Paul Thede 2010-06-19 Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Catalog of British Motorcycles Floyd Clymer 2014-03 84 pages, 83 black & white illustrations, size 8.25 x 11 inches. Published in the USA under the same title in 1951 by Floyd Clymer, the original publication was a pocket sized landscape format book and it is often criticized as difficult to read due to its small print size. Consequently, this edition was re-formatted into a larger and more conventional portrait size which has increased the text size by almost 40%. This publication provides the reader with an insight into the country, and the manufacturers, that were ultimately destined to succumb to the dominance of the Japanese motorcycle industry. A total of 33 different British motorcycle manufacturers and their various models are included and sadly, less than a handful of those 33 manufacturers survive today. A 'must have' resource for any motorcycle enthusiast and an invaluable reference for anyone interested in British 'iron'. Many of the motorcycles featured within are highly collectible today and the predominance of these early manufacturers no longer exist. This truly historical documentation of the glory years of British motorcycle manufacturing has been out-of-print and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. We are pleased to be able to offer this reproduction as a service to all motorcycle enthusiasts worldwide.

Riding in the Zone Ken Condon 2019-10-15 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.
